Performance data shown represents past performance and is no guarantee of future results. Past performance is net of management fees and expenses and reflects reinvested dividends and distributions. Past performance reflects the beneficial effect of any expense waivers or reimbursements, without which returns would have been lower. Investment returns and principal value will fluctuate and when redeemed may be worth more or less than their original cost. Returns for periods less than one year are not annualized. Current performance may be higher or lower and is available through the most recent month end at harborcapital.com or by calling 800-422-1050.

The Fund's returns achieved during certain periods shown were unusual and an investor should not expect such performance to be sustained.

The Fund Has Favored Long-Term Investors

- The investment team does not attempt to time markets based on short-term fluctuations and believes that growth of earnings should ultimately drive performance over a long-term horizon.
- Their disciplined focus on their time-tested philosophy and approach has resulted in strong outperformance over longer-term periods.
- In fact, the Harbor Capital Appreciation Fund (Instl) has outperformed the Russell 1000 Growth Index in 76.3% of rolling 10YR periods since assuming management of the Fund in May 1990.

Investment Process

- Jennison’s team believes that companies that possess durable competitive advantages driving strong levels of earnings and cash flow growth are best positioned to deliver excess returns over the long-term.
- Jennison employs a bottom-up, research intensive process, including performing detailed analysis on 100 - 150 companies that meet the team’s investment criteria; company management meetings are a critical component of the process.
- The team maintains a longer-term view of 3 to 5 years (portfolio turnover generally lower than 50%) and ultimately seeks companies with catalysts driving long-term growth, skilled management teams, balance sheet strength, and appropriate valuations.
- Risk management is embedded throughout the portfolio construction process and results in a well-diversified portfolio with exposures across growth sectors.

- Jennison’s focus on multi-year structural growth opportunities has produced a consistently compelling estimated 3-5YR earnings per share (EPS) growth premium for the Fund versus the Russell 1000 Growth Index and broad market equities (S&P 500 Index) over the last ten years.

All investments involve risk including the possible loss of principal.

There is no guarantee that the investment objective of the Fund will be achieved. Stock markets are volatile and equity values can decline significantly in response to adverse issuer, political, regulatory, market and economic conditions. At times, a growth investing style may be out of favor with investors which could cause growth securities to underperform value or other equity securities. Since the Fund may hold foreign securities, it may be subject to greater risks than funds invested only in the U.S. These risks are more severe for securities of issuers in emerging market regions.
